BIO

EOS is an emerging online platform for contemporary electronic music operating from Frankfurt am Main. It aims at building an expansive, community-oriented infrastructure for fostering and interconnecting artists and music professionals. In addition to a web radio at its core, EOS incorporates an affiliated label and a broad network of experts and collaborators as a starting point for new possible formats, mentorings and alliances.

To counteract the long-term aftereffects of the current situation, EOS dedicates its undertakings to one thing above all: amplifying the sounds in which our present is inscribed and strengthening the musical communities behind them.

EOS is independently run by Oliver Bauer and Pascal Mungoli and funded by the Hessische Kulturstiftung.
